

WHITE OILED FLOORS

Instructions for mechanical care

The initial treatment with Maintenance Oil and a disc machine is optional for all oiled floors and is recommended for more intensive use.

Faxe or Woca Maintenance Oil white is applied directly after installation and polished with a disc machine evenly into the wood floor.

Shake the container well before use. Pour some Maintenance Oil white directly on the floor and use a disc machine with a tan pad to evenly spread the oil and work it completely into the surface. Use absorbing cloth to remove excessive oil from the surface.

1 litre yields for 40~60 m²

Dust dry after 30 minutes, walking possible at 20°C and without shoes the next day, fully cured after 3 days.

Prior to the initial use of Maintenance Oil, dirty surfaces must be cleaned with Faxe Intensive Cleaner and water in a ratio 1:40.

2 CARE PRODUCTS TO CHOOSE

FAXE AKTIVCARE WHITE

Faxe Active Care makes the surface particularly insensitive against dirt.

For every wet cleaning Faxe Active Care white is added to the cleaning water. Active Care cleans and protects the oiled wood surface.

Shake the container well before use. Add Faxe Active Care white to the cleaning water (1 part for 20 parts of water) to wipe the floor.

For dirty floors please use a 2nd bucket filled with clear water. First mop up the floor with Active Care solution, pick up dirty liquid with the mop, rinse it in clear water and wring it out well.

After this wipe the floor again lengthwise with clean Active Care solution.

Never wipe with water only!

1 litre is good for 20 litres of cleaning solution and ~150 m².

Dry after 20 minutes.

FAXE/WOCA WOOD FLOOR SOAP

Wood Floor Soap is a traditional product for smooth clean and care of the floor.

Faxe or Woca Wood Floor Soap white is added to the cleaning water. Wood Floor Soap cleans and protects the oiled wood surface.

Shake the container well before use. Add Wood Floor Soap white to the cleaning water (1 part for 40 parts of water) to wipe the floor.

For dirty floors please use a 2nd bucket filled with clear water. First mop up the floor with Wood Floor Soap solution, pick up dirty liquid with the mop, rinse it in clear water and wring it out well.

After this wipe the floor again lengthwise with clean Wood Floor Soap solution.

Never wipe with water only!

1 litre is good for 40 litres of cleaning solution and ~300 m².

Dry after 20 minutes.
