

Renovation of worn or heavily polluted floors

Faxe Intensive Cleaner is an environmentally friendly basic cleaner. It is solvent-free and contains no fragrances. Dirt and remainings of worn cleaning and care products are reliably removed. Intensive Cleaner is diluted with water. For normal basic cleaning 1:40, with heavy soiling 1:10.

Products & Tools

- Faxe Intensive Cleaner, cotton mop and 2 buckets
- In severe cases, a floor machine with a cleaning pad can be used as a support.

Step by step

- Fill 2 buckets with approx. 5 litres of warm water each. Add Faxe Intensive Cleaner into one of the buckets.
- Wet wipe the wood with the cleanerwater, loosen and absorb dirt.
- Wipe with clear water damp and allow to dry.

Finishing

After cleaning and drying, the floor must be reoiled again and then is usually like new.

See „Finishing for oiled Berg & Berg floors“

Attention

Intensive cleaner must **not** be used in the cleaning water for regular cleaning.
